Tech

General crag grading: ★★

Bouldering site only

Rock: limestone, mostly stable

Routs length: 1-5M

Routs quantity: 28 known problems

Season: All year; in winter it can get a bit chilly. Best conditions are from March till June and September till November.

Shade: In summer, it tends to get hot in sectors 1-3 because they are not entirely shaded by trees (though facing north). Even so, most of the boulders are among trees or bushes so its possible to climb even on a hot summer day.

Things to do around: the Mnt. Miron nature reserve offers many fine hiking trails. "Huta 6" is an interesting caving experience not more then 20 min drive away, near Beit-Jan. Other then that, two of the galilee's major climbing sites are close by, Yonim and Gita.

Cellular coverage: yes

Camping: It's possible to camp under the boulder of sector 1 or in the clearing behind it. A much more peaceful option is in the area of boulder 10, please avoid lighting campfires there. In general, keep campfires confined and try to re-use old fire spots. Please do not use wood from the local scrub.

Getting there...

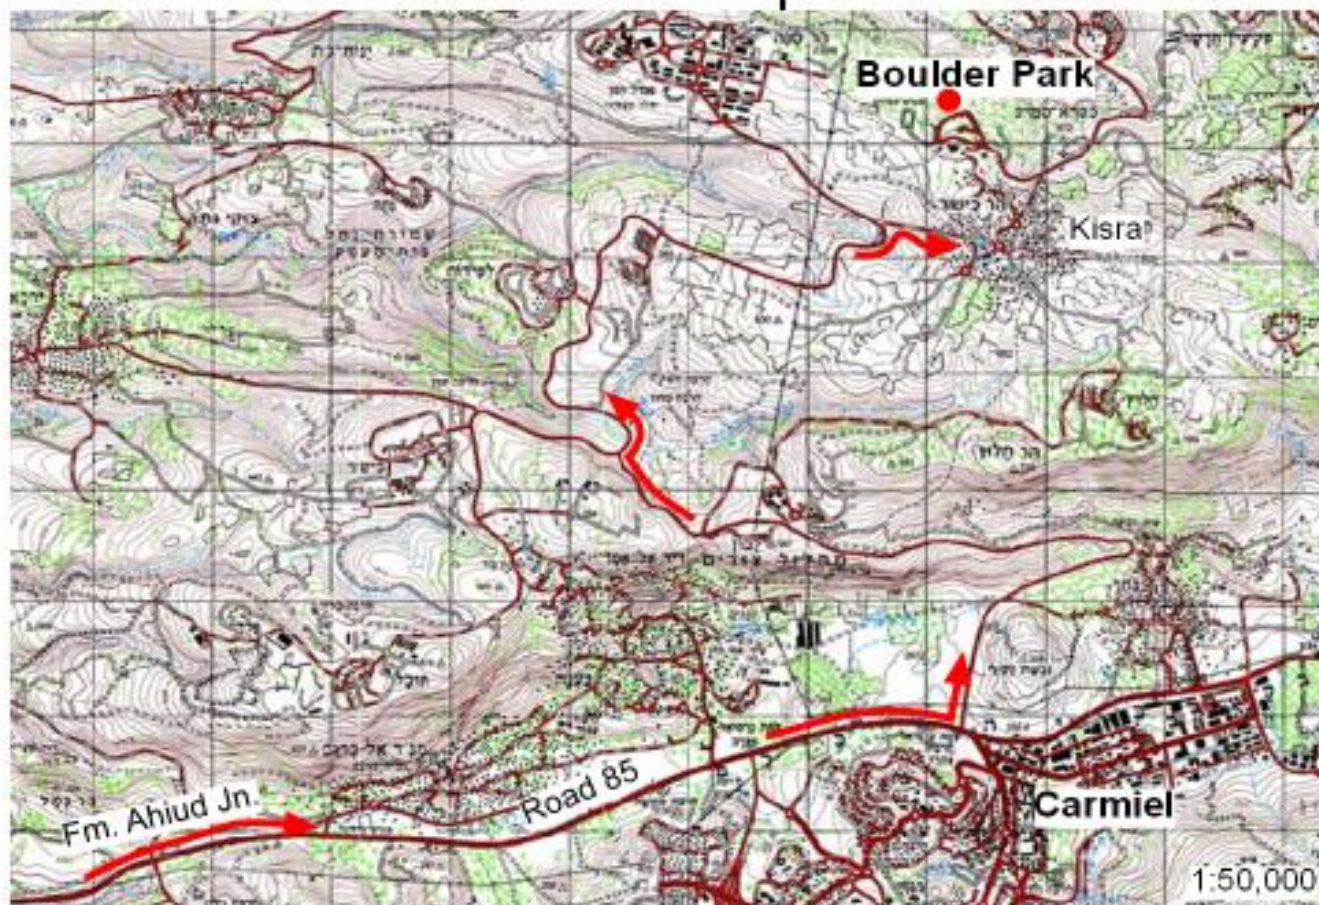

From Yagur junction near Haifa, head North on road 70 toward Somekh junction, where you turn right and immediately left towards Ahihud junction, on road 70 again. At Ahihud junction turn right and head towards Carmiel. Drive East until Carmiel junction and turn left before the entrance to the city (there is a sign pointing you to Kfar Vradim, Tefen and Maalot). Climb up and continue for about 16 km until you'll see the village of Kisra on your right. Turn right and enter the village, follow small signs (Hebrew only) pointing you to the Boulder Park.

About the place

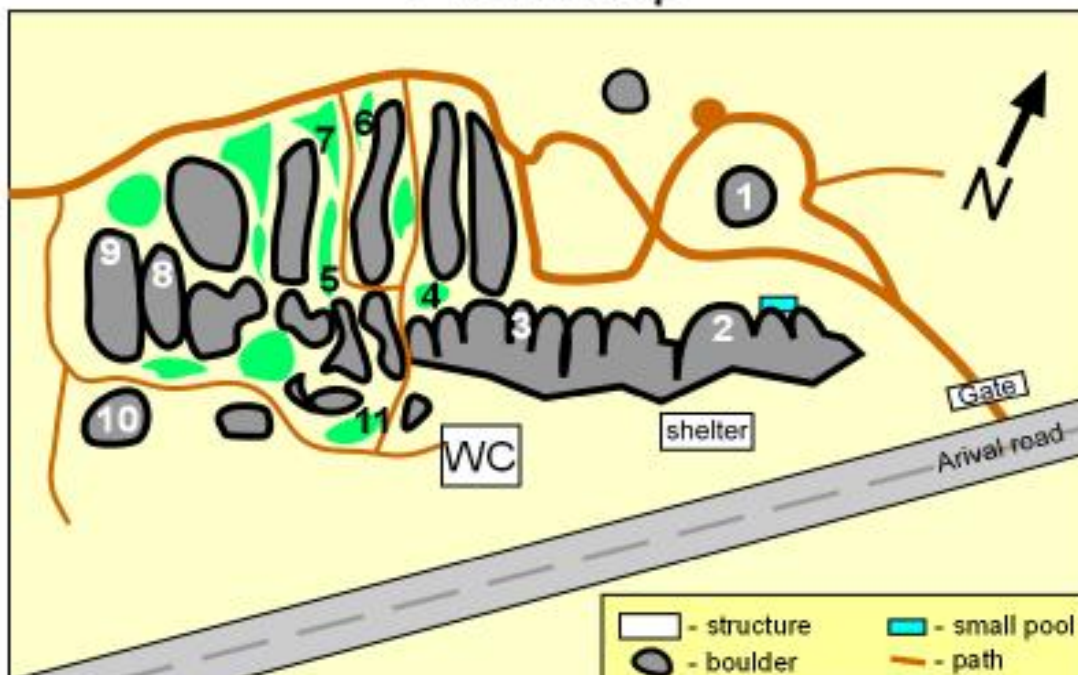

Although young climbers from nearby Maalot and Kfar Vradim started bouldering here during the 90's, it wasn't until **Yair Cooperstein** and his "gang" arrived from the Tel-Aviv area that serious development started. Most of the problems were developed during 2000-2004. **Gil Averbuch**, who probably sent all the problems in the park, developed some new ones for the bouldering event that was organized by ILAC in Autumn 2007.

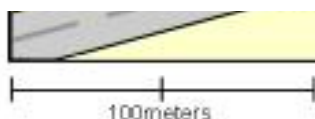

Please note that the site is a municipal park. The Druze people of Kisra-Smea developed it and are currently operating it. As of today climbers are welcomed. During your visit, try not to act in any way that might change that.

Area map

Park map

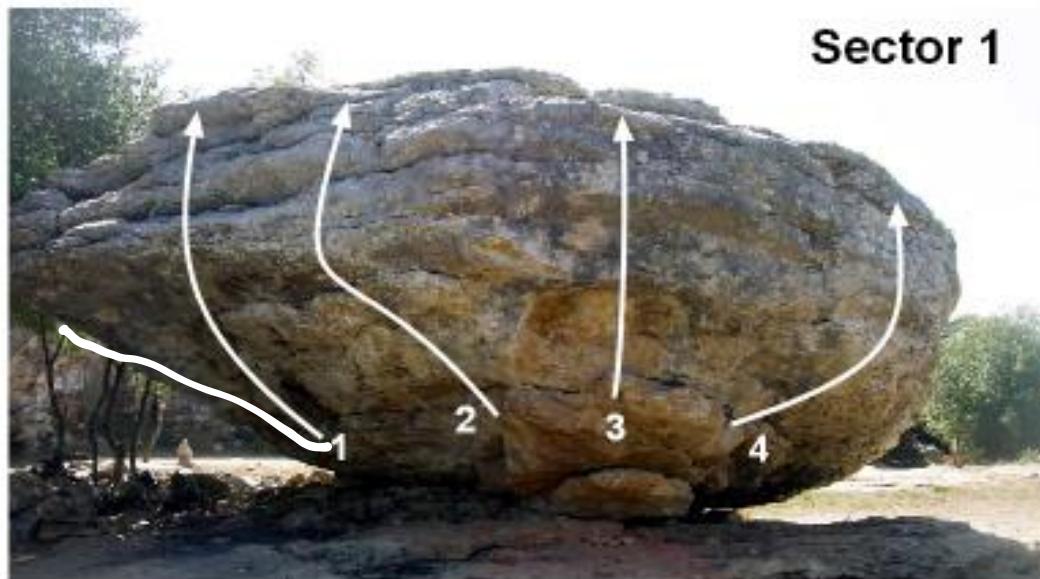

6 - bouldering area

-2-

Rev.1, 2009

Sector 1

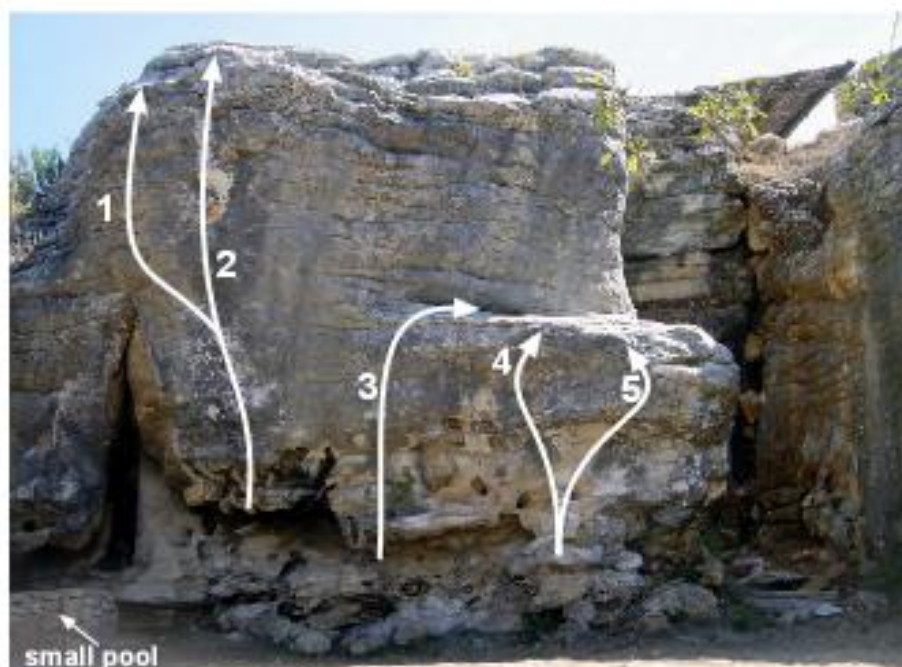

1. **V2/3**. Sit-start and straight up to the top.
2. **V2**. Sit-start on two jugs and then left and up.
3. **V3**. Start with the big sloper and straight up to the top, check out the dynamic way.
4. **"Worth a Shekel" V3**. Sit-start and left to the top.

Sector 2

1. **"Put a Mamota"**
V6. Start under the little roof and left to a small crack, to the top through the ledges. **Highball**.

2. **"Put a Mamota Direct"** **V6/7**. similar to 5 only straight up to the top and right. **Highball**.

3. **V4**. Straight up and mantel right on to the ledge.

4. "Mooha Dynamic" V5/6. Start with the big jug and jump to two slopers, then mantel up.

5. "Mooha Static" V2. Same start as 4 only head right to the good hold, and up you go.

-3-

Rev.1, 2009

Sector 3

1. V1. Straight up to the top. descend carefully through the left crack.

2. V2. Start with a mouth shaped hold, left to the roof and then up and right. Be careful when coming down.

Sector 4

1. **Painful V5.** Sit-start holding a cube shaped hold then straight up with the left sloper.
2. **V2.** Start via the big crack and through the jugs.
3. **V5/6.** Sit-start and veer left.

-4-

Rev.1, 2009

Sector 5

1. **V2.** Sit-start, up through the small roof.
2. **V2.** Sit-start on the left side of the boulder and up.
3. **"Bulldog" V6.** Sit-start and crimp left and up.
4. **"Pit Bull" V4.** Sit-start, two crimps and straight up.
5. **V2.** A 4meter face with ledges all the way up.

photo: Itay Kishon

Sector 6

V2. Start with the high sloper on the face and then straight up. This is the original problem.

A later version is to sit start from the very bottom on 2 jugs, then all the way up, **V5**.

-5-

Rev.1, 2009

Sector 7

V0/1. Start with the white mark. Many variations...

Sector 8

V7. Start with the ledge and pocket, then up through the roof. Beware of the bad fall from the edge.

climber: Omer Pokorni

-6-

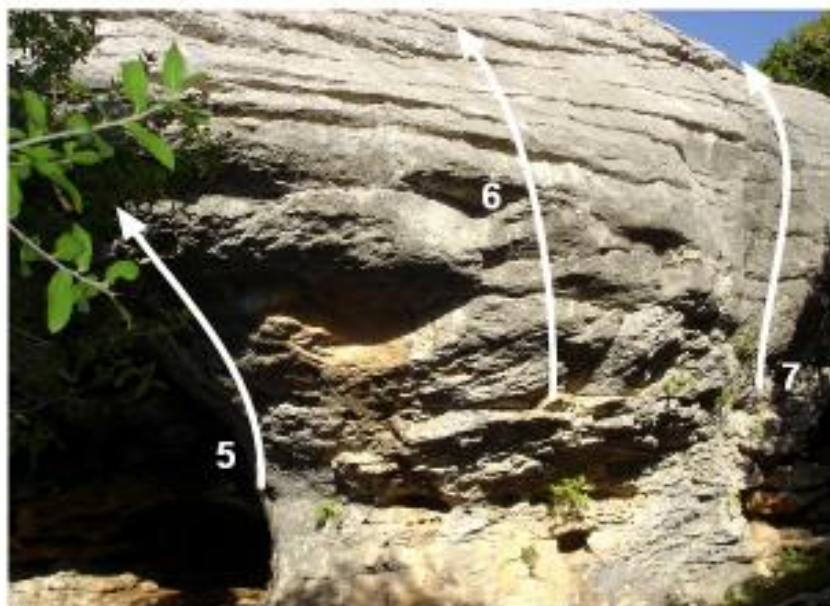

Rev.1, 2009

Sector 9

Beware of bad falls when
topping out the problems
here. Highball.

1. **"UFO" V7.** Start with the left side of the ledge and then straight up through a crimp on the edge. An optional sit start from the beginning of "Pim Pam Pom" would bring you to **V8**.
2. **"Scorpion King" V(?)**. Start with the right side of the ledge and head up through the triangle feature. The hardest problem in the park, named after a famous scorpion close encounter nearby.
3. **"Pim Pam Pom" V5.** Sit-start inside the cave, through the jugs, up to the pockets and out left. Beware of scorpions...
4. **"Tour the Block" V6.** Start with the big ledge on the very left side of the roof, about 1.5M left of UFO's ledge.
5. **"Crimpiada" V7.** Start with the lower crimps and up to a tiny hold. Top out not seen in the photo.
6. **"The Joke / The Mental" V6(?).** Start on jugs and up to the pink lichen. From there, see if you can pull up... **Highball.**
7. **V1.** Straight up through the iuds.
